

5.0L Coyote Plate Installation Instructions

We have put together a few install tips to help your install go smoothly. If you have any questions and require tech help please call our tech line at **866-648-7637**

- **Step 1** Disconnect Battery Cables.
- **Step 2** Remove strut tower brace. (This is applicable if installing on stock intake car. This allows for intake cover to be removed)
- **Step 3** Remove engine cover by pulling up on it to release its mounting pins from the grommets. (Stock Intake, not applicable on Boss 302 Intake Manifold)
- **Step 4** Remove air inlet tube and set aside.
- **Step 5** Remove the four mounting bolts from the stock throttle body, as you remove the throttle body, flip it to unplug the motor plug on the bottom.
- **Step 6** Place the nitrous plate in between the throttle body and intake. Use the supplied bolts to bolt the throttle body and plate back to the intake. The jet holder fittings will be facing the driver side of the car. If you are using the vehicle specific 5.0L plate system, place the constructed solenoid bracket on the throttle body before inserting the supplied bolts. See photos below.
- **Step 7** Tighten all (4) bolts on the throttle body.
- **Step 8** For vehicle specific system, insert hard line into the solenoid. (DO NOT TIGHTEN COMPRESSION FITTING!) Put the appropriate jetting into the plate fittings, and then connect hard lines to the plate. After tightening the fittings at the plate, you will be ready to tighten the compression fittings on the solenoids. Tighten down compression fittings on the solenoids until tight.
- **Step 9** After checking that everything is tight, continue with system install as usual. Wait to reinstall intake cover and strut tower brace until system is completely installed.

Attention: This is a custom built product. Jetting may vary from application to application. We strongly suggest dyno tuning with a wide band 02 reading to make sure your air fuel is correct.

Thank you for Choosing Nitrous Outlet for all your nitrous needs & for trusting us to supply you with the quality parts and service you need!!!!
